This office action is in response to applicants' response filed on 11/26/07. Claims 1-20 are still pending in the application.

### ***Response to Arguments***

Applicant's arguments filed 11/26/07 have been fully considered but they are not persuasive. Applicant argued that Wehrung does not teach upon detecting a state change converting a signal associated with a state change to a TCP/IP formatted request.

Examiner submits that Applicant has incorrectly interpreted the prior art of record. Wehrung is directed to a method for a material transport system that discloses state change and state change detection (fig 20), wherein as a result of the state change other conversion and modification including remote commands/requests take place in the system (see par 0179-0191). Wehrung teaches LAN. It is therefore concluded that the signal/ command associated with any change in the system would be effected in a TCP/IP formatted manner. The commands/requests allow for a smooth transportation of material from one destination to another. It must be noted that the state change in question deals with starting, stopping, moving and ending and so on of material/object movement on the conveyor. (see fig 20). Accordingly, examiner believes that Wehrung teaches the invention and its concept as claimed.

### ***Allowable Subject Matter***

Claims 2 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
